

Short-Bio

KETmaritime is a project that aims to transfer Key Enabling Technologies (KETs) to the Maritime Industries of the Atlantic Area.

Focused on building a cooperative network that stimulates innovation and competitiveness, the project embraces the challenge of increasing the capabilities, skills and knowledge on KETs in an integrated and cross-national approach.

The consortium brings together seven partners from five different countries that, under the framework of the project, will work closely with industries and businesses.

The ultimate goal is to bring to market new processes, products and services.

Partners: INL - International Iberian Nanotechnology Laboratory, Fórum Oceano - Association of Maritime Economy, CIMAP, PRODINTEC, MaREI, MSE, AIMEN

KETmaritime is a project funded by the Interreg Atlantic Area Program.
