Agenda “Key Enabling Technologies (KETs): innovation drivers for the marine sectors” event

KETMARITIME Project

- 10:00 – 10:10 Welcome and presentation of the event by INL (Iberian Nanotechnology Laboratory), coordinator of KETMARITIME, INTERREG Atlantic Area financed project.
- 10:10 – 10:40 “General Applications and Trends of KETs in the marine sectors”, by IDONIAL Technology Center.

Business Success Stories

- 10:40 – 13:00 Different organizations will present illustrative cases of technological innovation in different marine-related fields:
 - Técnicas y Servicios de Ingeniería, TSI (Cristobal García Pariente) → Application of fiber reinforced plastics in the manufacture of large commercial vessels, H2020 FIBRESHIP project.
 - Sociedad Anónima de Electrónica Submarina, SAES (Antonio Sánchez García) → Civil Applications of Underwater sensors.
 - MCVALNERA (Diego Souto Couceiro) → Climate data supported port management.
 - Windar Renovables, Grupo Daniel Alonso (Manuel Ignacio Pérez Rodríguez) → Offshore wind energy innovation.

(Includes a 15-minute coffee break)

Global framework for innovation support

- 13:00 – 13:30 Perspective on financial supports for carrying out innovation activities in related sectors. CDTI, Center for Industrial Technological Development.
- 13:30 Close of the event –light meal and networking session.

Place: IDONIAL headquarters, Gijón, Avenida Jardín Botánico 1345, 33203 Gijón, Asturias

Registration: David Santos González david.santos@idonial.com, 984 39 00 60 ext: 1504
